

# Last.Backend Dedicated Cloud

*We offer dedicated resources with cloud flexibility*

## OVERVIEW

Last.Backend's Dedicated Cloud service combines a private cloud platform with best of breed technology implementations. This powerful combination equips your business with the tools to rapidly build, control and customize your IT environment.

Last.Backend Dedicated Cloud eliminates the capital burden of investing in expensive physical server deployments that often go underutilized.

Every component of Last.Backend Dedicated Cloud supports the demands placed on your infrastructure without the burden of long-term contracts or the lead time of traditional deployments. With Dedicated Cloud you are able to deploy compute resources quickly and easily when you need them and turn them off when you do not.

Last.Backend Dedicated Cloud offers enterprises a way to reshape their environments to meet the needs of hybrid IT without sacrificing security and performance.

## Locations

Last.Backend Dedicated Cloud is available in 9 locations worldwide, spanning North US and West Europe.

## FEATURES

- ⬡ Dedicated, private cloud infrastructure providing secure virtualized hosting
- ⬡ High availability instance failover with 99.9% SLA
